MINISONIK

Ultrasonic Washing Machine

For Videos

Fast, reliable and economic solution in parts washing!

Minisonik's Standarts

- Machine is produced completely in stainless steel
- Timer is mechanical or digital (optional)
- Operation temperature is controlled by mechanical or digital thermostat (optional)

Application Areas

- Automotive spare parts cleaning as injector elements, pump's elements, spark plug etc.
- At hospitals, clinics, laboratories, medical materials and surgical instruments
- Dentist's instruments
- Jewellery products
- Electronic components and PCB cards
- Textile industry equipments

Operation Principles

High frequency (25 kHz) which is obtained is liquid, creates millions of microscopic air bubbles loaded with vacuum energy, strike to dirty surfaces and explode and so oil, chip, carbon, lime, blood tissue are removed.

Technical Specifications

MINISONIK	Mini 4	Mini 12	Mini 18	Mini 28
Wash Volume (L)	4	12	18	28
Inside Dimensions	240 x 140 x 150	300 x 240 x 200	330 x 300 x 200	505 x 300 x 200
Outside Dimensions	260 x 160 x 320	320 x 260 x 400	350 x 320 x 500	530 x 320 x 500
Power (W)	150	250	500	500
Ultrasonic Frequency	25 - 40 kHz	25 - 40 kHz	25 - 40 kHz	25 - 40 kHz
